Costco - BI Engineer - Data Analytics (Dallas)

Description

This is an environment **unlike anything in the high-tech world** and the secret of Costco's success is its culture. The value Costco puts on its employees is well documented in articles from a variety of publishers including Bloomberg and Forbes. Our employees and our members come FIRST. Costco is well known for its generosity and community service and has won many awards for its philanthropy. The company joins with its employees to take an active role in volunteering by sponsoring many opportunities to help others. In 2018, Costco contributed over $39 million to organizations such as United Way and Children's Miracle Network Hospitals.

Costco IT is responsible for the **technical future of Costco Wholesale**, the second largest retailer in the world with wholesale operations in twelve countries. Despite our size and explosive international expansion, we continue to provide a family, employee centric atmosphere in which our employees thrive and succeed. As proof, Costco consistently ranks in the **top five of Forbes "America's Best Employers"**.

The Business Intelligence (BI) Engineer - Data Analytics is responsible for the successful delivery, design, and support of high visibility desktop reports, mobile reports, and dashboards. The successful candidate will work closely with end-users and Product Owners to evaluate business requirements and develop informative views and dashboards to help Costco run its business more efficiently. Responsibilities will also include incident management and providing proper feedback to end-users regarding reporting system status and/or errors.

If you want to be a part of one of the **BEST "to work for" companies in the world**, simply apply and let your career be reimagined.

ROLE
